Exciting Fun

We Bring Science to Life

Next Generation Science Standards
Our school assembly programs are aligned to the Next Generation State Science Standards and help your students think like scientists, discovering the living world around them.

Utilizing children’s fascination and natural connection with animals, our programs make learning science relevant, meaningful and accessible to all learning styles and second language learners.

We cover specific fundamental life sciences in a way that students can understand and relate to, regardless of their age.

An Expert Staff that Cares
True professionals in bringing science alive, our educators ensure that your assembly program is exciting, captivating, and grade-level specific.

Nurturing Caring and Empathy
Our programs foster a sense of wonder, empathy and respect for wildlife and all living beings, touching the hearts and minds of children in powerful and transformative ways.

What your colleagues say about us

“Wildlife Associates is an exemplary program that sets a world standard in educating our youth about the living environment.”
— Noel Brown, Director / United Nations, Environmental Program

“The stories, the science, and the connections are always so beautifully taught. This year, I was even more blown away, seeing the powerpoint. The way you integrated the technology to immerse students in the lessons as well as the animals lives was terrific. Just another powerful presentation. You kept the attention of every student and adult in the room...making them feel your passion for these animals and our relationship with them and the world they come from.”
— Science Teacher / St. Charles Elementary

“From the little Kinders through the middle schoolers – every single eye and ear was on you and the animals during the entire assembly. Absolutely fabulous. Wildlife Associates does an amazing job of connecting science and environmental stewardship in an easily understandable way. Just impressive. The sheer volume of information and concepts so expertly woven into a seamless presentation. The slides with photos and vocabulary just perfectly illustrate the lessons and are so helpful. Just perfectly wonderful…”
— Principal / St. Catherine Elementary

“Your program plays a crucial role in sparking an interest in science for our students. Thank you!”
— Carole Seligman / Sunshine Gardens Elementary, South San Francisco

“I would like to express my enthusiastic, unwavering support for Wildlife Associates! You have taught my children for over 25 years and you improve with each passing year. Thank you for all of the values that you have imparted to my many students.”
— Josh Griffith, Principal / John Gill School, Redwood City
ANIMALS OF THE AMERICAS
KINKAJOU • VULTURE • FOX • COATI • FALCON

North, Central and South America contain some of the world's most amazing animals and habitats. Discover how these animals survive and prosper through their connections with other living things, as they help to sustain life on our planet.

CALIFORNIA WILD
FOX • GREAT HORNED OWL • PORCUPINE • OPOSSUM • RED-TAILED HAWK

These intriguing animals will spark your students' curiosity and increase their knowledge of California's wonderful natural history as they gain insights into the secret lives of the intelligent and ecologically important animals that live around us.

SPIRIT OF THE RAINFOREST
COENDOU • ANTEATER • SCARLET MACAW • SKINK • SPECTACLED OWL

Transport your school to some of the most wondrous rainforests of the world. Students will see unusual and awe-inspiring animals and come to better understand the tropical rainforest and its plants, wildlife and people. This program is a powerful multicultural learning experience.

CREEPSY CRITTERS
BOA CONSTRICTOR • TORTOISE • ALLIGATOR • TARANTULA • MONITOR LIZARD

This program explores the gentler side of the most misunderstood animals of the wild kingdom. We dispel myths and explore the important roles these animals have in nature's diverse web of life. Students will learn the significance of all living things, even the “creepy” ones.

PREDATORS AND THEIR PREY
AFRICAN SERVAL CAT • ARMADILLO • BARN OWL • KESTREL • AFRICAN PORCUPINE

These incredible animals from around the world offer a fascinating way for your students to learn science. The predator-prey relationship is key to understanding the balance of nature and the importance of biodiversity, and gives us an appreciation of the vital role predators play in healthy ecosystems.

Cost & Length
ONE ASSEMBLY: $495
A SECOND ASSEMBLY GIVEN DIRECTLY AFTER THE FIRST: $395

It is most effective to group your students by grade level.
Assembly lasts about 45 minutes.
As experienced educators, we adapt our programs to meet the specific ages and grade levels of each audience.

Each animal’s welfare is our primary concern so at times there may be changes to a program lineup.
